

October 2011

ARTERIAL STREET RESURFACING PROJECT

Design is complete, and upon award of the construction, materials testing and quality assurance, and project inspection oversight contracts by the City Council on October 4, 2011, the Arterial Roads Rehabilitation Project is underway. The areas encompassed in this project include the following:

1. Palos Verdes Drive West from Hawthorne Boulevard to 2,200 feet west of Terranea Way
2. Palos Verdes Drive South from Terranea Way to Narcissa Drive, and west of Schooner to Conqueror

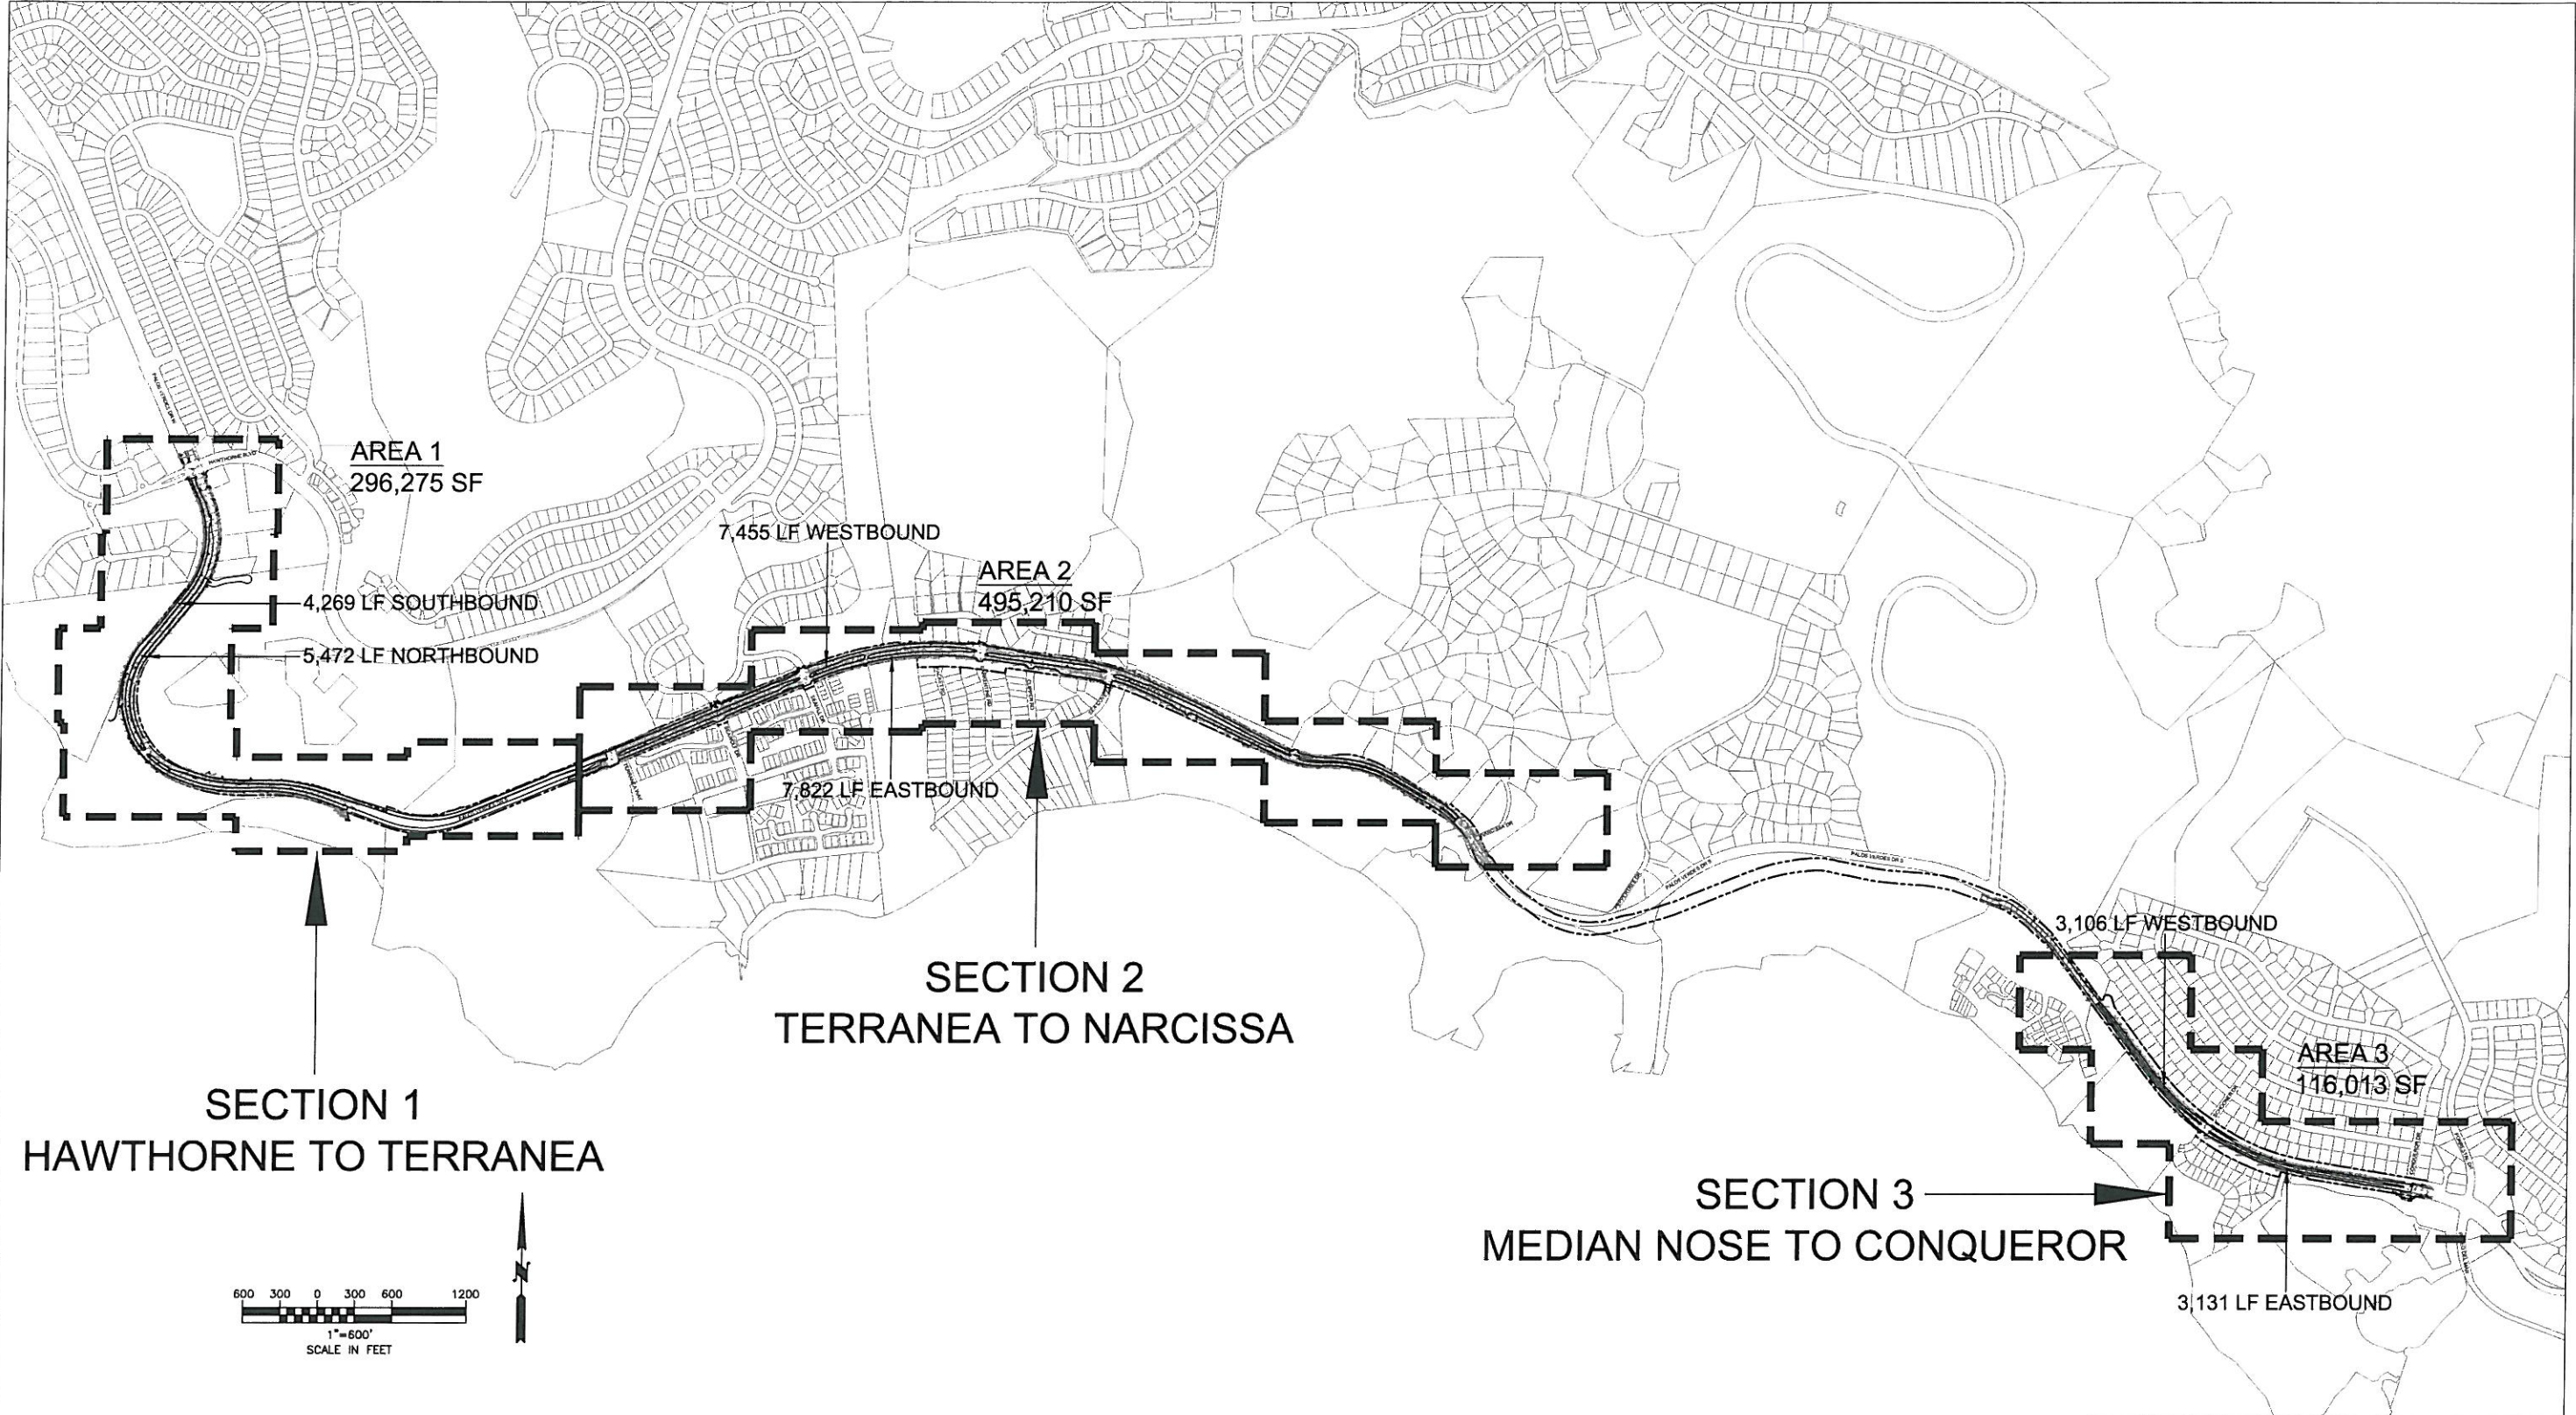

This project includes approximately 3 miles of streets. Proposed improvements include rubberized asphalt concrete, microsurfacing, sidewalk and trail improvements, bus stop improvements, and upgraded signage and roadway striping. Please see exhibit below for project location.

This project is funded by Proposition C and Proposition 1B funds, totaling more than \$2,500,000. Construction is anticipated to begin in mid- to late-November 2011. Completion of the construction of the improvements for the aforementioned streets will bring the City that much closer to reaching the goal of 90% of the City's primary roadways being in "very good to excellent condition," per the 2009 Pavement Management Project Report.

If you have any questions regarding this project, please call the project information hotline at 1-800-698-7390.

Thank you,
