

GREEN BUILDING RESIDENTIAL CERTIFICATION CHECKLIST AT FINAL INSPECTION

As contractor/architect/owner/engineer, I _____ certify that the following green building code requirements have been incorporated into the new residential building at _____, authorized by building permit # _____.

- _____ Indoor water use fixtures are in compliance with Item 1 on the Green Building Code Mandatory Residential Requirements (GBCMRR) document.
- _____ Outdoor water use is in compliance with Item 2 on the GBCMRR.
- _____ Joints and openings in the building envelope have been sealed in compliance with Item 3 on the GBCMRR.
- _____ A copy of the Operational and Maintenance Manual required by Item 4 of the GBCMRR has been placed at the site.
- _____ Adhesives, sealants, caulks, paints, coatings, aerosol paints, carpet systems, resilient flooring systems, and composite wood products used at the site are in compliance with the GBCMRR.
- _____ The concrete slab (if applicable) for the project has been installed per Item 13 of the GBCMRR.
- _____ The moisture content of the floor and wall framing did not exceed 19 percent when the building framing was enclosed.
- _____ Each room containing a bathtub, shower, or tub/shower combination has been provided with an approved mechanical exhaust fan per Item 15 of the GBCMRR.
- _____ A whole house exhaust fan if installed is in compliance with Item 16 of the GBCMRR.
- _____ The heating and air-conditioning system is in compliance with Item 17 of the GBCMRR.

Signature _____ Date _____

The following documents are required to be provided prior to final approval of the building:

- _____ Operational and maintenance manual.
- _____ Concrete slab and detail cross section.
- _____ Wall framing and floor framing moisture test results.
- _____ Flow rate documentation for all installed plumbing fixtures.
