

Photoshop Elements 8 Editing Tools Workshop

Start: January 25, 2010

End: April 5, 2010

Class meets on Mondays only. No class on 2/15.

Time: 10a.m. – 12p.m.

Cost: \$125.00

With each new version of Photoshop Elements, new or improved editing tools and features are introduced. The latest version, Photoshop Elements 8, has continued this practice. These tools add entirely new capabilities or semi-automate tasks that heretofore could only be done manually, which required a far better understanding of the program.

In this unique class, we will concentrate on exploring these new features that are often not that visible even to those who have some experience using the program. Although we will be using Photoshop Elements 8, several of the editing tools are also available in recent earlier versions of the program.

A small sampling of some of the tools/features we will use include Group Shot, PhotoMerge Exposure, Filter Gallery, Magic Extractor, and Scene Cleaner, as well as several others. Additionally, the course will be taught in a workshop environment allowing the student to bring in their own photos on which to work.
