Subject: Portuguese Bend Nature Preserve (future) Comments
To: joelr@rpv.com

Joel Rojas

Please accept this feedback on the subject in light of the current status and Steering Committee inputs on the adjacent Forrestal Nature Preserve. Equestrian activities have been accommodated in the Forrestal Trails Plan, but are in competition with a full plate of community, sporting, and pedestrian activities in the RPV Ladera Linda Community Center and adjacent School Board sites.

Please consider the use of an old tried and true road (off PV Dr South) for auto and horse trailer access to already developed trails in the Portuguese Bend site. Attached photo HELO0027_4 clearly shows this area. Advantages are it's isolation from the heavily populated and used areas to the east and it's natural accommodation of existing equestrian activities to the west and north.
