

# Canyons Preserve Equestrian Trails Recommendation

Portuguese Bend Pony Club

October 2, 2007

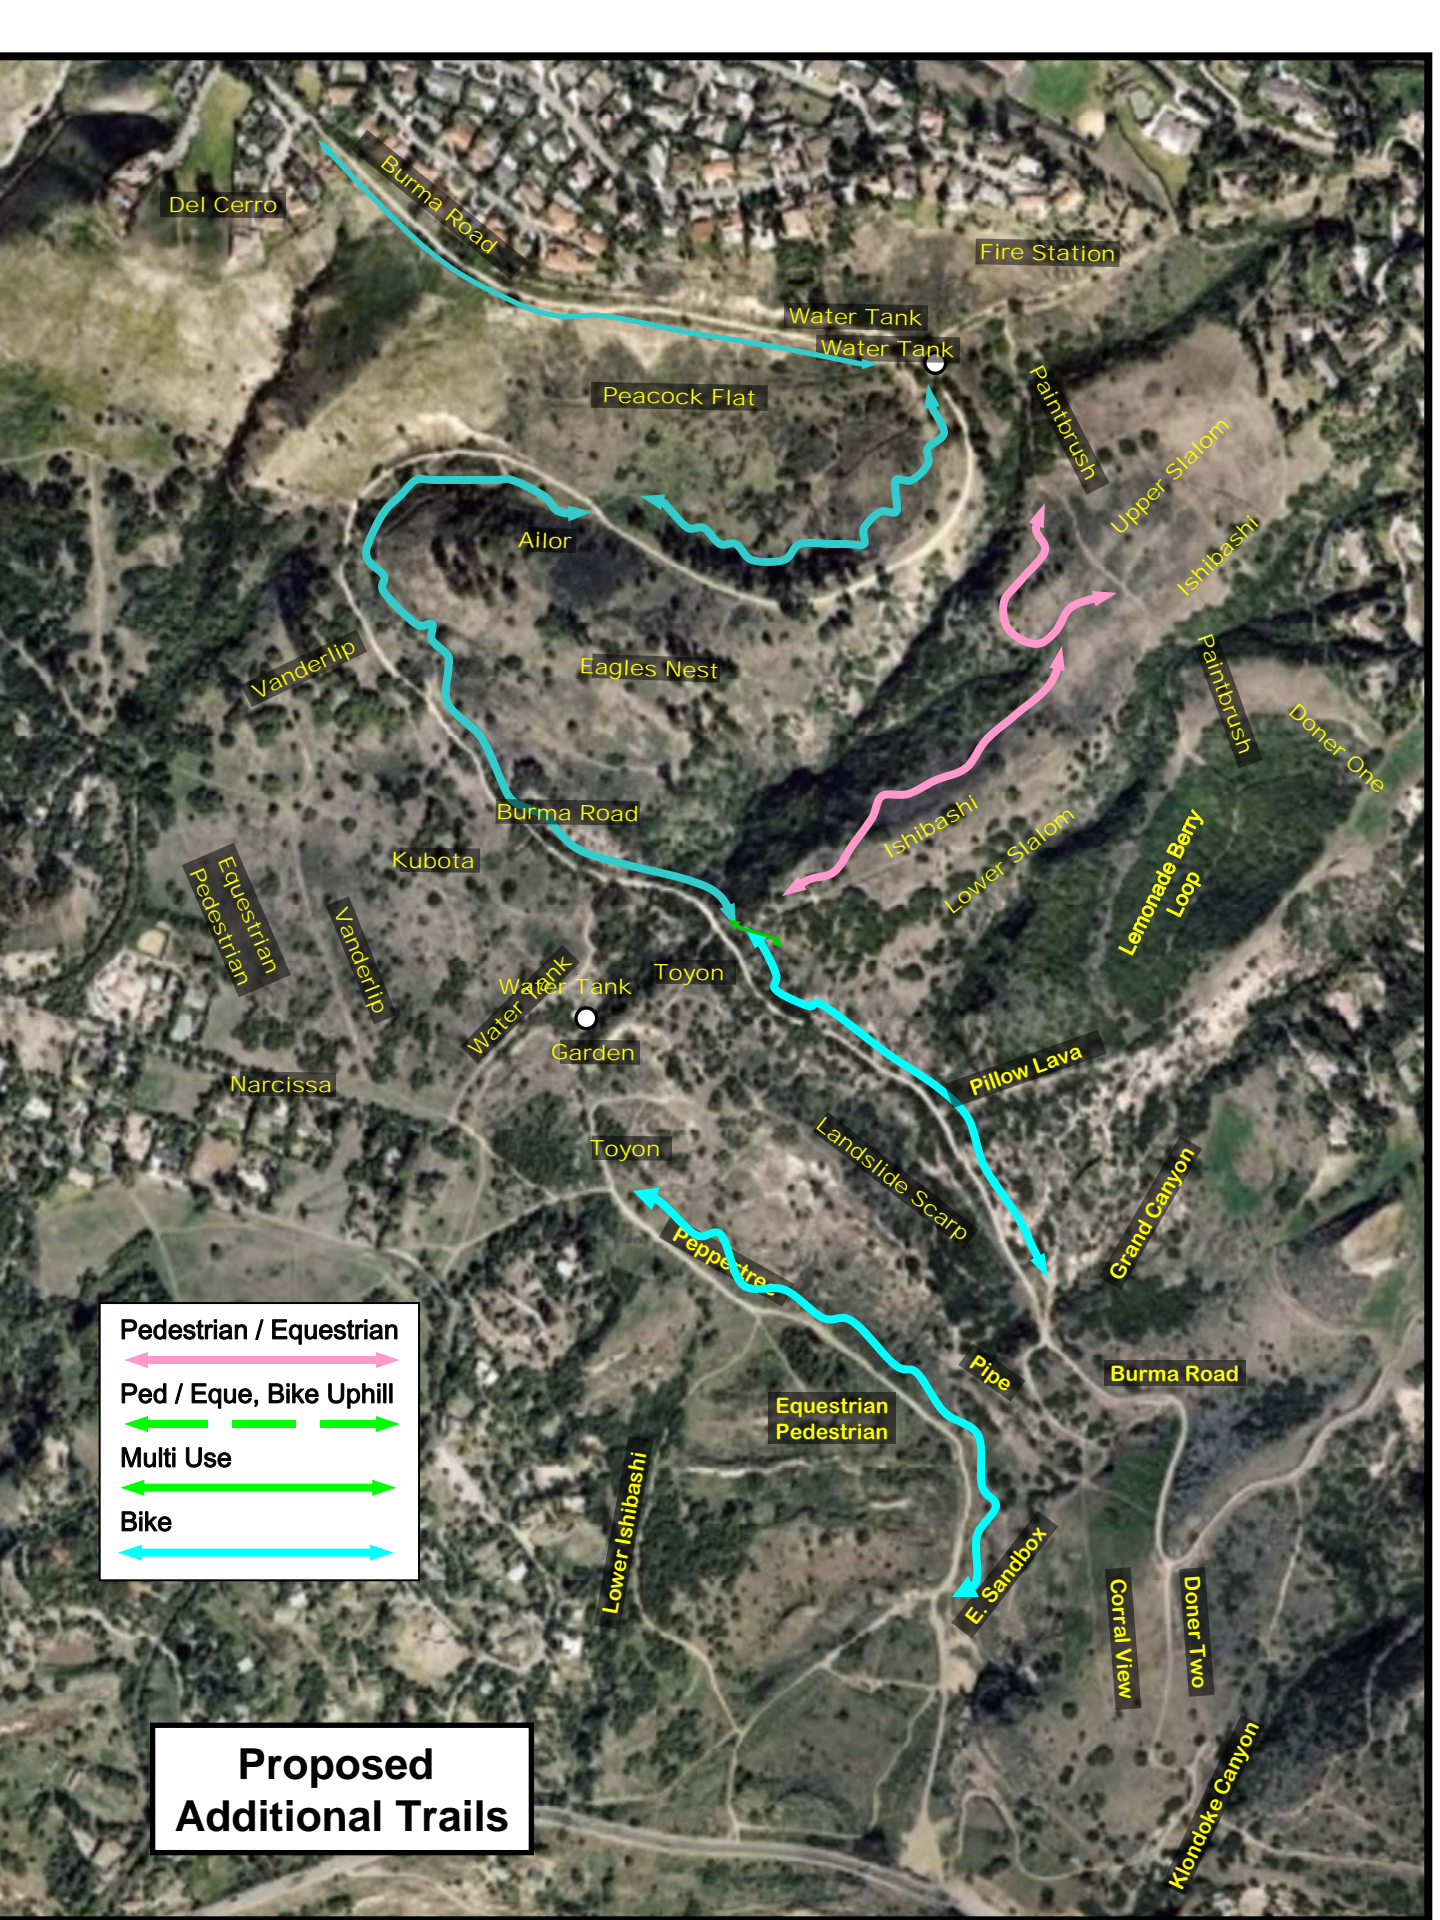

# Equestrian Trail Compatibility Guidelines

- Equestrians would prefer complete separation from Mountain Bikes
  - Bikes in Forrestal ...Pedestrians and Horses in Canyons
- Horses and bikes don't mix well
  - Training and education can mitigate some of the risks

**However, we appreciate that there must be equitable use of Open Space**

- Recommend separating Mountain Bikes from Equestrians and Pedestrians where possible
- Horseback riding greatly enhanced with large areas without bikes
- Trail loops are desirable
- Uphill courteous bikers are better than down-hillers
- Allow mountain bikes to travel uphill on mixed use trails where it is the only access trail
