

RANCHO PALOS VERDES
Department of Planning, Building & Code Enforcement

Letter of Intent to Participate in the City of Rancho Palos Verdes Voluntary Green Building Construction Program

This letter is to confirm my intent to design and construct my home following integrated, sustainable design principles, using green building technologies and materials as defined by *Build It Green* (single-family/multi-family residential projects), *LEED* (non-residential projects), or a similar third-party green professional as approved by the Director of Planning, Building and Code Enforcement prior to submittal into Planning or Building and Safety Plan Check.

I (We), _____, have designed the (residential or non-residential) project, located at _____, to meet the minimum requirements established by *Build It Green* or *LEED* or obtain “green” certification once the project is completed. I (We) acknowledge and understand that participation in the City of Rancho Palos Verdes Green Building Construction Program is voluntary and benefits will only be granted upon proof of final certification by a *Green Points Rater (Build It Green)* or a *LEED* accredited professional and subsequent approval by the Director of Planning, Building and Code Enforcement. Further, all employees performing work on this project are aware of my/our intent, expectations, and requirements to meet the goals of certified “green” construction.

I(We) will show this letter upon submittal into Planning or Building and Safety Plan Check to ensure that the City is aware of my intent to participate in the voluntary Green Building Construction Program.
