Subject: City Hall Phones

Peter, met with Dennis & Ted this PM.

It was a waste of time. An exercise in futility.

Contracts signed, Check sent, Awaiting delivery.

Dennis attempted to minimize cost difference because of other needs for Gigabit LAN.

Without Gigabit costs, first year costs will still exceed \$100K.

Although Dennis wanted to add fees for me, there was no discussions about costs for Ted V / PV Net.

What is really disappointing is that I have worked to get you elected.

I have pushed door bells for you.

I contributed financially to that effort.

When I sent you an e-mail prior to the Aug. 6 Council meeting,

I presumed you would, at least, listen to what I had to say.

You could have removed this item from the agenda & not allowed a Aug 6 vote.

I am an RPV taxpayer. I have an RPV business license.

That I was not contacted was because City Hall had an agenda.

More will follow regarding this stupid decision.
